GarliSafe

Nature's Shield for Poultry Health

Concentrated Garlic Extract

GarliSafe

Nature's Shield for Poultry Health

GarliSafe is a highly concentrated garlic extract that exhibits potent gastrointestinal digestive properties, antimicrobial activity, and immunomodulatory effects.

Composition:

• Garlic Extract :	NLT 15%
• MOS :	10%
• Excipients like HSCAS, Silica, Calcium Carbonate :	Qs.

Mode of Action:

GarliSafe contains a highly concentrated extract with a minimum of 15% garlic extract. In its natural form, garlic contains it is alliin and enzyme alliinase, which are stored separately. Upon ingestion, the digestive process within the animal's gut activates alliin, allowing it to interact with alliinase and generate alliin, a biologically active metabolite. Alliin exhibits multiple beneficial properties, including antimicrobial and immunomodulatory effects that enhance animal health and performance. The advanced formulation technology of GarliSafe ensures the stability and bioavailability of alliin (Diallyl thiosulfates) for optimal efficacy.

Benefits:

1. GarliSafe's Antimicrobial Action: GarliSafe exhibits antiviral, antibacterial, antifungal, and antiparasitic properties, along with anti-inflammatory and antioxidant effects, contributing to overall animal health.
2. GarliSafe for Gut Health: GarliSafe effectively disinfects the intestine, enhances digestive function, and boosts immune response, ensuring optimal gut health.
3. GarliSafe's Role in Microbial Balance: GarliSafe suppresses harmful bacteria like E. coli and Salmonella while promoting the growth of beneficial probiotics such as Lactobacillus and Bacillus subtilis.

4. GarliSafe for Meat Quality Enhancement: GarliSafe improves meat flavor and reduces cholesterol levels, ensuring superior meat quality and nutritional benefits.
5. GarliSafe's Impact on Feed Efficiency: GarliSafe acts as a feed attractant, stimulating better feed intake and enhancing feed conversion ratio (FCR) for improved productivity.
6. GarliSafe's Antifungal Protection: GarliSafe prevents mold growth, including Aspergillus flavus and Aspergillus fumigatus, thereby improving feed storage stability and quality.
7. GarliSafe and Cross-Resistance Safety: GarliSafe is fully compatible with other drugs and supplements, making it safe for continuous use in poultry feed without resistance concerns.

Recommended Usage:

Chicken/Ducks: 100 g– 300 g per tonne of feed

Pigs/Cows: 100 g– 350 g per tonne of feed

Fish: 120 g– 500 g per tonne of feed

Presentation :

25 kg Bag

Storage Conditions:

Store in a cool, dry place away from heat, light, and children's reach.

Not for human or medicinal use –

Poultry feed supplement only.
